COMPATABILITY

All Series 60 (S60) 3rd & 5th Edition Devices are supported.

Nokia 3250, 5500, 5700, 6110, 6120, 6121, 6210, 6220, 6290, E50, E51, E60, E61, E61i, E62, E63, E65, E66, E70, E71, E75 E90, N69, N71, N73, N75, N76, N77, N78, N79, N80, N81, N81 8GB, N82, N85, N86, N91, N92, N93, N95, N95 8GB, N96, 5320 XM, 5320 XM, 5800 Xpress Music E52, E55, 5530 xpress, 6710 Navigator, 6730 Classic, N97, X6, Sony Ericson Satio, LG KS10, Samsung SGH-G810, Samsung INNOV8, Samsung SGH-L870

INSTALLING/UNINSTALLING

The application should be installed the same as all native Symbian applications. Transfer the application to your device via Bluetooth, USB, etc, or Download OTA and you will be prompted automatically to install the application.

* **NOTE:** Install to your internal device memory for optimum performance & stability. Save clips to your memory card.

To uninstall the application, go to the App. Manager (Typically Menu -> Settings - Data Mgr -> App Mgr), select AdvanceSMS from the list, and choose **Options -> Remove**. This will uninstall the application completely.

----- REGISTRATION -----

The application by default is in a 14 day trial mode state when first installed. Upon the first install you will be prompted to input your registration code, but during the 14 day demo period you will be able to bypass by choosing "Trial". You can input your registration at any time from the main Options menu.

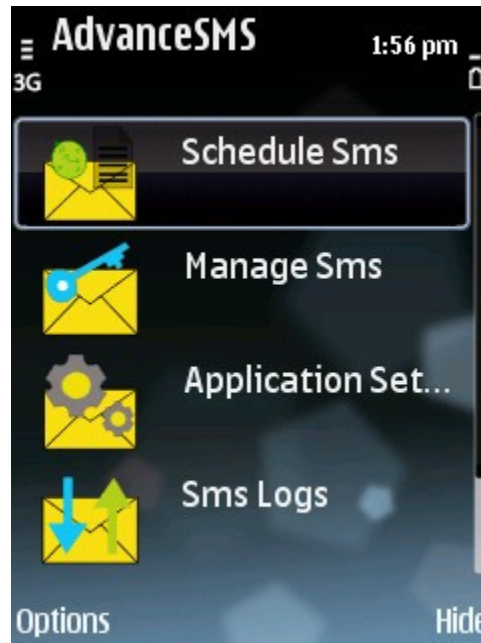

If you already have a registration code, you can input it into the Reg. Code field and press the "Register" button (left Softkey).

----- IMPORTANT NOTES - PLEASE READ! -----

Any SMS sending performed by AdvanceSMS will be sent using native SMS sending method and as such will incur normal network charges just like sending a normal SMS.

----- APPLICATION USER GUIDE -----

----- MAIN MENU: -----

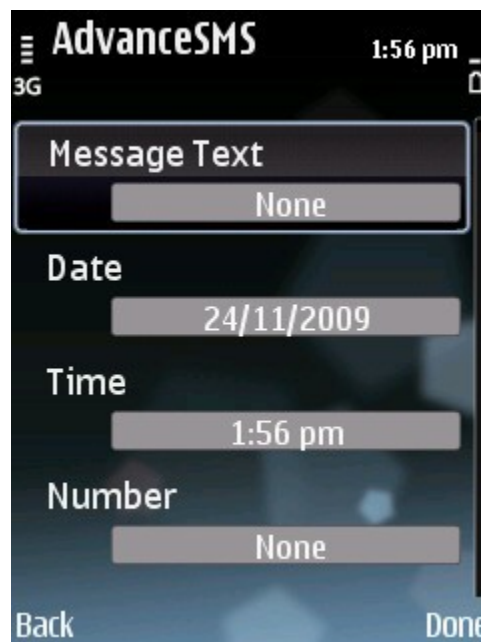

This is where you'll be when you first run the application. You'll have a left and right softkey option:

Options ->

- + Help - Displays the in-app user guide
- + About - A bit about the app and Killer Mobile Software
- + Register - Input your 5 digit registration code
- + Exit - Shuts the application down
- + Hide - Places AdvanceSMS in the background. Application will be active

Schedule SMS >>

This is where you can create an SMS message to send at a future date. If no scheduled messages exist, you'll see the following options:

+ Options

-> Schedule SMS - Choosing this option will take you to the Schedule SMS menu

- + Message Text - Write the message text here
- + Date - choose the date you want to send the message on
- + Time - Choose the time you want to send the message at
- + Number - The message recipient goes here if scheduling an SMS
- + Email - The message recipient goes here if scheduling an Email

-> Done - Pressing this saves the scheduled message

-> Back - Cancels the process - scheduled message will NOT be saved

If there are existing scheduled messages you'll see them listed on the screen and you'll have two additional options:

-> Edit - Edit the selected Message

-> Delete - Delete the selected scheduled message - it will NOT be sent

**** NOTE:** If "Schedule Prompt" is enabled in the main settings menu you will be automatically prompted to schedule SMS's sent from the native messaging application. On some occasions you may see a dialog "Message Deleted" after choosing Yes/No to this prompt, but your message will still be sent and or scheduled properly.

+ Back - goes back to the main menu screen

Manage SMS >>

This area will allow you to setup custom actions to certain incoming messages including Filter, Custom SMS tones and Auto Reply. To get started add a new number or group from the Options Menu. Once the number/group is added go to the Options and edit the "Number Settings" to setup the rest.

+ Options

-> Add Number

- > From Contacts - choose number from contacts
- > Enter Manually - input the number manually
- > Private Number - Private/Withheld/Unknown numbers
- > PhoneLog - choose the number from your Call/SMS logs

-> Add Person - Choose a name from your contacts

-> Add Group - Choose a group from your contacts

-> Add All non-contacts - applies the action to any number that's not in your contacts

-> Delete - Deletes the selected entry

-> Number Settings - Takes you to the settings screen for the selected number/group to setup the preferred actions

** Once you've added a number or group to you can click on your new entry to bring up the Management options.*

- + Filter SMS - SMS will be received 100% silently, no tone, and will not show up in the native messaging app
- + Auto Reply - Sends an Auto-reply SMS message in response to a received SMS (sms charges apply!)
- + Auto Reply Text - If the AutoReply Setting is Enabled, this will be the next that is sent
- + Play SMS Tone - Enable/Disable, for playing a custom SMS tone in place of the device standard SMS tone for this sender
- + SMS tone - Choose a custom SMS tone (which will replace your default SMS tone) for this number/group - AMR, MP3 and WAV formats are supported.
- + Filter rules – (All, Monday – Sunday) Choose the days that the Filter/Action should be active
- * Press "Done" to save the changes or "BACK" to exit without saving the changes.

----- **Application Settings >>** -----

- + AutoStart >> - Disabled by Default. Enable to have AdvanceSMS startup when the device is rebooted
- + Log Duration >> Default 10 days. Number of days filtered messages will stay in the logs
- + Password Protection >> Disabled by default. Set to Enabled to have application require a password
- + Pwd >> Default is blank. Input a numeric password. Only valid if Password Protection setting is enabled.
- + Unread SMS Alert >> Enable this setting to have an alert tone played when you have received an unread SMS
- + Status Indicator >> Disabled by default. Enable to have a small icon displayed on the top panel of the screen to indicate the application is active and be alerted to new filtered messages in the logs.
- + Unread Beep Time Sec >> - The amount of time in seconds between alert tones for an unread SMS if the Unread SMS Alert setting is enabled

+ Show Schedule PopUp - If enabled will prompt you to schedule an sms when sending from the native messaging application. You will have the option to Schedule (SMS will not be sent, and you'll be taken to an interface where the message can be scheduled), if you choose "No", the message will be sent normally.

+ Forward- Enable/Disable - If enabled the application will forward any incoming SMS's to the number or email account indicated

+ SMS Forward Number - input a Mobile Number to forward incoming SMS's to

+ SMS Forward Email - input an Email address to forward incoming SMS's to (* Requires you have an email account already setup on your device)

** Press the "Back" (right softkey) option when you are done to save your settings.*

----- SMS Logs >> -----

Here you'll find a list of any filtered messages you've received. If you have the "Status Indicator" set to ON you will see this icon change color when a new filtered message has arrived. You can click on any message to read it's contents.

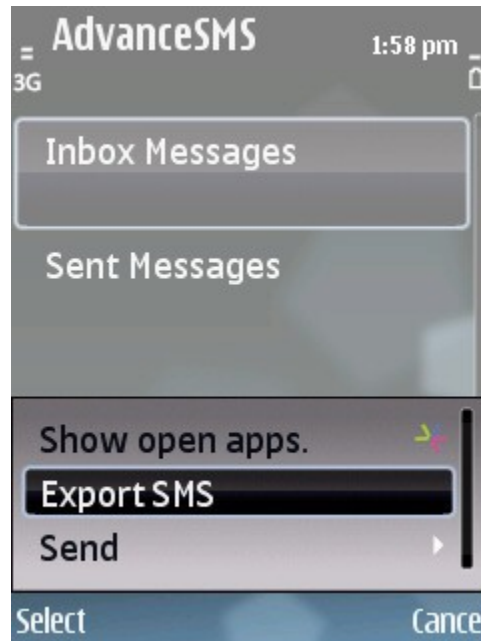

+ Options

-> Delete - Deletes the message permanently

-> Restore - Restores the SMS to your native messaging application as a new message

+ Back - Goes back to the main menu

Export SMS >>

This feature allows you to export your Inbox of Outbox sms messages as a CSV file to transfer to your PC. Message will be exported to **C:\ExportedMessages.csv**
